***Allowable Subject Matter***

Claims 11-18 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 11 and 12 recite an automobile audio system comprises amplifier circuitry for amplifying an input signal, over-voltage protection circuitry for interposing between a vehicle battery voltage and an amplifier voltage supply, wherein the over-voltage protection circuitry comprises switch circuitry is connected between the vehicle battery voltage and the amplifier voltage supply, switch control circuitry for sensing the amplifier voltage supply and regulating current flow through the switch circuitry, wherein the control circuitry comprises a three bucking DC voltage regulator configured as a voltage controlled current source for providing a control signal to the switch circuitry.

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.
